

Charles Jones

Smart Contract/Software Developer

Summary

I want to help connect the world to web3 by developing secure and user-friendly smart contracts.

Work Experience

Software Developer/Freelance, Remote

January 2023 - Present

- Contributed to learning content for Account Abstraction
- Developed semantically structured smart contracts and web applications to meet project requirements.
- Implemented agile methodologies, such as SCRUM, for effective project management and delivery.
- Contributed to the development of proposals and technical capabilities for project solutions.

Current Projects:

Cyfrin Updraft - Contributor

Develop learning content for advanced Solidity and Foundry concepts such as Account Abstraction for Ethereum and zkSync contracts.

Run Bro - Project Manager & Smart Contracts

This web application is an innovative fitness and rewards platform that leverages blockchain technology to track and reward users for their physical activity:

- Tracks user's daily steps and determines a tokenized reward based on the user's steps in comparison to total user steps.
- Tools used include Chainlink Functions, Solidity, Foundry, Next.js, and Google Fit API.

Language Coaching and Consulting at Victoria ELD

Co-Founder | 2014-2022

I specialized in delivering tailored programs of instruction, catering to the diverse needs of both local and global professionals. My consultancy extended to prestigious corporations such as IMB, Google, Goldman Sachs, POSCO, Deloitte, Samil PWC, Adidas, eBay, General Motors, P&G, Shinsegae, LG Electronics and Life Sciences, and SK Energy.

Throughout my consultancy journey, I was instrumental in guiding and empowering thousands of students and professionals. My focus lied in honing their communication skills, ensuring success in pivotal moments like job and university entrance interviews, as well as achieving targeted scores in exams including IELTS, TOEFL, TOEIC, TOEFL JR, GRE, SAT, and OPIc.
